*February 19, 2024 at 2:30 pm*

*St. John's Hall, Bath*

*Topic: Nature's Underground*

**Most of us are familiar with plants that grow above ground, but did you know that there is a whole underground network that is very important for the survival of these plants as well as ourselves? The soil that we plant in plays a vital role in supporting this network.**

**Please join us as we view relevant short films on this topic followed by discussion of what we can do in our home gardens to improve soil health.**

***Not a member? We always welcome guests to our meetings.***

**Please bring your own mug to help minimize clean-up.**
